

First Registrars & Investor Services Limited

Brand Identity & Communication Guidelines

Executive Summary

This document provides a structured brand and communication guideline for First Registrars & Investor Services Limited, based on the current website, public notices, support channels, visual assets, and content patterns available within the repository.

Although the repository does not contain a standalone corporate brand manual, the existing website and communication assets provide a clear foundation for a consistent brand identity and professional communication style.

The current brand is best described as:

- corporate,
- trustworthy,
- formal,
- service-led,
- shareholder-focused,
- and compliance-aware.

This guideline is intended for:

- technology partners,
 - designers,
 - content writers,
 - marketing teams,
 - customer support teams,
 - and external vendors working with First Registrars.
-

1. Brand Overview

Organization Name

The primary corporate name is:

First Registrars & Investor Services Limited

The shorter brand name used across the website is:

First Registrars

Some legacy content may still reference:

First Registrars Nigeria Limited

Future communication should standardize around **First Registrars & Investor Services Limited** for formal documentation and **First Registrars** for shorter public-facing references.

2. Brand Positioning

First Registrars is positioned as a professional registrar and investor services organization focused on:

- share register administration,
- shareholder engagement,
- investor communication,
- records management,
- transaction processing,
- and technology-enabled registrar services.

The strongest recurring positioning theme is that the company operates as a leading share data management and investor services provider in Nigeria.

3. Brand Identity

Brand Personality

The brand should consistently feel:

Attribute	Meaning
Trustworthy	Shareholders and clients can rely on the company
Professional	Communication must reflect corporate discipline
Service-Oriented	Every message should guide users toward support or action
Reliable	Processes should appear structured and dependable
Innovative	Digital platforms should show technology leadership

Attribute	Meaning
Compliance-Aware Public content should respect regulatory expectations	

4. Visual Identity

Logo Usage

The application uses two primary logo variants:

Logo	Usage
wwwroot/img/logo.png	Standard color logo
wwwroot/img/logo-light.png	Light logo for dark backgrounds

The logo should always be used with sufficient spacing and contrast.

Recommended Logo Rules

- Use the color logo on white or light backgrounds.
- Use the light logo on dark navy or dark neutral backgrounds.
- Do not stretch, distort, crop, recolor, or apply effects to the logo.
- Maintain clear space around the logo in headers, footers, documents, and partner presentations.

5. Brand Color Direction

The current visual system uses a corporate color palette built around navy, gold, white, and dark neutral tones.

Observed Brand Colors

Color	Hex Code	Recommended Usage
Deep Navy Blue	#12416f	Main brand color, headers, theme color
Gold Accent	#c49b36	Highlights, icons, premium accents
Primary Text Navy	#0e182a	Headings and strong text
Button Blue	#1d3f6d	Buttons, links, cookie consent styling
White	#ffffff	Backgrounds and content clarity
Dark Neutral	—	Footer and promotional panels

Usage Guidance

- Use navy as the dominant corporate color.
 - Use gold sparingly as an accent.
 - Use white space generously for clarity.
 - Avoid introducing unrelated bright colors unless approved for campaign-specific use.
-

6. Typography

The site uses the following fonts:

Font	Usage
Ubuntu	Body text and headings
Poppins	Layout and interface styling
Open Sans	Included through Google Fonts

Typography Guidance

- Use clean, readable typography.
 - Keep headings bold and direct.
 - Avoid decorative or playful fonts.
 - Maintain consistent hierarchy across pages, forms, notices, and presentations.
-

7. Layout & Design Style

The website follows a clean corporate design pattern.

Current Layout Characteristics

- structured hero sections,
- card-based service blocks,
- clear call-to-action buttons,
- strong use of white space,
- dark footer sections,
- promotional panels,
- icon-led navigation,
- and organized service summaries.

Design Direction

The brand should remain institutional, polished, and service-focused rather than playful or overly casual.

8. Brand Voice

Tone of Voice

The current communication tone is:

- formal,
- reassuring,
- informational,
- shareholder-friendly,
- service-oriented,
- and compliance-aware.

The tone should remain direct, respectful, and easy to understand.

9. Messaging Style

Preferred Communication Pattern

Good communication should:

1. State the purpose clearly.
2. Explain what the user needs to do.
3. Provide the required action button, form, link, or contact option.
4. Add supporting information only where necessary.

Common Messaging Patterns

The current site uses:

- short descriptive headings,
 - plain explanations,
 - direct action instructions,
 - trust-building language,
 - and service excellence positioning.
-

10. Core Values

The About page identifies the following values:

Value	Communication Meaning
Fidelity	Be dependable and trustworthy
Innovation	Support digital transformation
Respect	Treat shareholders and partners professionally
Service Excellence	Make support clear, helpful, and reliable
Tenacity	Show commitment to solving customer needs

These values should guide all public communication, user interface copy, service notices, and partner-facing materials.

11. Communication Principles

Good Communication Must Be

- clear,
- direct,
- professional,
- respectful,
- action-oriented,
- easy to follow,
- and aligned with corporate/regulatory expectations.

Writing Standard

Every communication should answer:

1. What is this about?
 2. What does the user need to do?
 3. Where should the user click, submit, call, or email?
 4. What happens next?
-

12. Preferred Call-to-Action Language

The website mainly uses short action verbs.

Approved CTA Examples

CTA	Recommended Usage
-----	-------------------

CTA	Recommended Usage
Download	Forms, reports, documents
Apply Now	Digitised service forms
Email Us	Support or inquiry escalation
Contact Us	General contact
Online Access Portal	entry
Subscribe	Newsletter or updates

CTA labels should remain concise, action-driven, and easy to understand.

13. Approved Communication Channels

Website

The website is the primary public communication channel for:

- service pages,
- forms,
- annual reports,
- policy documents,
- investor notices,
- and corporate information.

Email

Channel	Address
---------	---------

Public Inbox	info@firstregistrarsnigeria.com
--------------	--

Live Chat

Channel	URL
---------	-----

Ebanco Webchat	https://webchat.ebanco.io/firstregistrars
----------------	---

Social Media

The website footer links to:

- Facebook,
- Instagram,
- X / Twitter.

Phone

The contact page includes support lines, office contacts, fax numbers, and liaison office information.

14. Audience Segments

First Registrars communicates with multiple stakeholder groups.

Primary Audiences

Audience	Communication Need
Shareholders	Forms, account access, dividends, support
Issuers / Client Companies	Registrar services and corporate actions
Investors	Reports, notices, dividends, account updates
Prospective Clients	Service credibility and capability
Regulators	Compliance and governance transparency
Support Visitors	Contact options and issue resolution

Every message should be written with the relevant audience and next action clearly in mind.

15. Document & Notice Style

Recommended Notice Structure

Public notices and document pages should follow this structure:

1. Large product, issuer, or event heading
2. Concise summary paragraph
3. Important date, time, and venue information
4. Clear document links
5. Supporting files grouped together
6. Final contact or support instruction where necessary

This pattern should be used for AGM notices, proxy forms, rights issue circulars, election documents, and regulatory communications.

16. Customer Support Style

The support style should be:

- direct,
- responsive,
- weekday-based,
- practical,
- accessible,
- and trust-focused.

Support communication should prioritize clarity over marketing language.

Recommended Support Response Pattern

1. Acknowledge the request.
 2. State the action required.
 3. Provide the correct form, email, phone number, or office location.
 4. Explain the expected next step.
-

17. Brand Do's and Don'ts

Do

- Use formal, respectful language.
- Keep instructions short and specific.
- Include exact dates, times, addresses, and links where needed.
- Use brand colors consistently.
- Use the correct logo for the background.
- Preserve the corporate tone across forms, notices, support pages, and partner materials.
- Make the user's next action obvious.

Do Not

- Use slang or overly casual marketing language.
 - Overload pages with long paragraphs.
 - Invent unsupported brand claims.
 - Introduce new colors or fonts without design approval.
 - Use vague CTAs such as "Click Here" where a clearer action is possible.
 - Mix old and current company names unnecessarily.
-

18. Editorial Standardization

Naming Cleanup Recommendation

Some content contains older or mixed naming conventions.

Recommended approach:

Current/Legacy Usage	Preferred Usage
First Registrars Nigeria Limited	First Registrars & Investor Services Limited
First Registrars	Use for short-form public communication
FRIS	Use internally or where already established

Editorial Recommendation

Future pages and documents should standardize company naming, service descriptions, CTAs, and support channels to improve brand consistency.

19. Strategic Brand Positioning

The First Registrars brand should continue to communicate:

- trust,
- shareholder confidence,
- operational reliability,
- technology enablement,
- service excellence,
- and compliance maturity.

This positioning supports the company's role as a registrar, investor services provider, and digital shareholder engagement platform.

20. Conclusion

The current First Registrars brand presentation is corporate, trustworthy, and service-led.

The communication style should remain:

- clear,

- formal,
- helpful,
- concise,
- professional,
- and action-oriented.

By standardizing its visual identity, message structure, CTA language, and support tone, First Registrars can strengthen public trust, improve shareholder experience, and present a more unified brand to partners, clients, investors, and regulators.

21. Brand Guideline Summary

Area	Guideline
