

First Registrars & Investor Services Limited

Connected Platforms & Customer Onboarding Ecosystem Documentation

Executive Summary

This document provides a comprehensive overview of the connected digital platforms, onboarding workflows, shareholder engagement channels, and supporting service ecosystems operated through the [First Registrars & Investor Services Limited platform](#).

The website serves as the central public-facing gateway into a broader ecosystem of:

- shareholder services,
- mobile applications,
- SMS-based platforms,
- registrar workflows,
- KYC systems,
- onboarding processes,
- and investor engagement solutions.

Rather than operating as a single monolithic application, the ecosystem is composed of multiple interconnected platforms and service channels designed to support diverse shareholder interaction models across web, mobile, SMS, registrar operations, and banking integrations.

This document is intended for:

- strategic partners,
 - enterprise stakeholders,
 - integration teams,
 - financial technology collaborators,
 - and digital transformation initiatives.
-

1. Ecosystem Overview

Platform Strategy

The First Registrars digital ecosystem is structured around multiple customer access channels designed to provide flexible investor engagement experiences.

The ecosystem supports:

- web-based shareholder access,
- mobile applications,
- SMS-based services,
- dividend processing,
- shareholder notifications,
- KYC verification,
- registrar operations,
- and broker-facing workflows.

2. Digital Platform Ecosystem

Core Connected Platforms

Platform	Primary Purpose
FRIS Mobile App	Mobile shareholder access
Online Access Portal	Web-based shareholder management
M-Access	SMS-based account access
e-Share Notifier	Shareholder alerts & notifications
e-Dividend	Direct dividend crediting
e-Lodgement	Broker certificate lodgement
KYC Verification	Customer identity & address verification
Register Management	Registrar-side shareholder administration

3. FRIS Mobile Application

Overview

The FRIS Mobile Application is the mobile-first shareholder engagement platform.

Website Endpoint

Item	Value
Page	/e-products/mobile
View	Mobile.cshtml

Core Features

The mobile application enables shareholders and investors to:

- view investment information,
 - check balances,
 - monitor dividend status,
 - verify mandates,
 - pre-register for AGMs,
 - update addresses and email records,
 - and access shareholder services remotely.
-

Mobile Distribution Channels

The application is distributed through:

- Google Play Store,
 - and Apple App Store.
-

Onboarding Workflow

Customer Registration Process

1. User installs the mobile application
 2. User submits personal registration details
 3. PIN is issued to the registered mobile number
 4. User changes default PIN
 5. Future access is performed using:
 - mobile number,
 - and secured PIN
-

Strategic Importance

The mobile app serves as:

- a digital shareholder companion platform,
 - a mobile investor engagement solution,
 - and an extension of the broader shareholder services ecosystem.
-

4. Online Access Portal

Overview

The Online Access Portal is the web-based shareholder self-service platform.

Platform Configuration

Item	Value
Website Endpoint	/online-access
Portal URL	https://access.firstregistrarsnigeria.com

Core Functionality

The portal enables shareholders to:

- access share accounts,
 - view statements,
 - print account records,
 - perform address updates,
 - and monitor dividend history.
-

Onboarding Workflow

Activation Process

1. Shareholder downloads activation form
 2. Form is completed with:
 - holdings information,
 - email address,
 - signature specimen,
 - GSM number
 3. Completed form is submitted to First Registrars
 4. Confirmation email is issued
 5. Username and password are generated for access
-

Strategic Role

The Online Access Portal functions as:

- the primary digital shareholder self-service platform,
 - and the central web-based investor management channel.
-

5. M-Access (SMS Shareholder Access)

Overview

M-Access is the SMS-based shareholder account access solution designed for mobile accessibility without internet dependency.

Platform Configuration

Item	Value
Page	/e-products/m-access
Access Channel	SMS / Mobile
Shortcode	6591

Core Features

M-Access enables shareholders to:

- retrieve share account summaries,
 - perform balance enquiries,
 - and check dividend information via SMS.
-

Onboarding Workflow

SMS Activation Process

1. User downloads activation form
 2. Form is completed and submitted
 3. Activation fee is paid
 4. Activation SMS or secret code is issued
 5. User sends PIN to shortcode 6591
-

Key Strategic Advantage

Unlike the Online Access Portal, M-Access:

- operates without internet connectivity,
 - supports lower-bandwidth environments,
 - and improves accessibility for broader customer demographics.
-

6. e-Share Notifier

Overview

e-Share Notifier is the shareholder notification and alerting platform.

Platform Configuration

Item	Value
Page	/e-products/e-share-notifier
View	ENotifier.cshtml

Notification Coverage

The platform delivers alerts for:

- dividend payments,
 - bonuses,
 - certificate verification,
 - AGM/EGM notifications,
 - address changes,
 - bank mandate updates,
 - and shareholder account activities.
-

Onboarding Workflow

1. User downloads activation form
 2. Holdings and GSM information are completed
 3. Proof of payment is attached
 4. Documents are submitted
 5. Activation SMS is issued after processing
-

Business Value

The notifier platform improves:

- shareholder communication,
 - investor engagement,
 - and real-time service visibility.
-

7. e-Dividend Platform

Overview

The e-Dividend platform enables direct electronic dividend payment into shareholder bank accounts.

Platform Configuration

Item	Value
Page	/e-products/e-dividend
View	EDividend.cshtml

Core Benefits

The platform:

- eliminates physical dividend warrants,
 - accelerates dividend payment processing,
 - and improves shareholder convenience.
-

Onboarding Workflow

Dividend Enrollment Process

1. Shareholder downloads or collects activation form
 2. Bank validates the form with:
 - signature,
 - and official stamp
 3. Completed form is submitted to registrar
 4. Confirmation SMS is issued after activation
-

Strategic Importance

The platform supports:

- digital financial transformation,
 - operational efficiency,
 - and reduced physical processing overhead.
-

8. e-Lodgement Platform

Overview

e-Lodgement is the broker-facing certificate lodgement and CSCS integration workflow.

Platform Configuration

Item	Value
Page	/e-products/e-lodgement
View	ELodgement.cshtml

Core Functionality

The platform enables:

- electronic certificate transfer,
 - broker visibility into lodgements,
 - and irregular lodgement monitoring.
-

Onboarding Workflow

1. Stockbroker downloads activation form
 2. Form is completed
 3. Documents are submitted
 4. Activation fee is paid
 5. Activation email is issued after processing
-

Strategic Role

The platform supports:

- broker operations,
 - CSCS integration workflows,
 - and registrar operational efficiency.
-

9. First Dividend Prepaid Plus Card

Overview

The prepaid dividend card platform enables dividend payments through a reloadable payment card ecosystem.

Platform Configuration

Item	Value
Page	/e-products/first-dividend-plus-card
View	DividendCard.cshhtml

Core Features

The card supports:

- dividend crediting,
 - ATM withdrawals,
 - POS transactions,
 - online purchases,
 - and additional wallet funding.
-

Activation Workflow

1. Cardholder performs ATM/POS PIN activation
 2. Card becomes active for use
 3. Funding can occur through:
 - FirstBank,
 - or First Registrars channels
-

Strategic Value

The prepaid card extends shareholder services into:

- digital banking,
 - electronic payments,
 - and financial convenience channels.
-

10. KYC & Address Verification Platform

Overview

The KYC platform supports customer verification and onboarding validation workflows.

Platform Configuration

Item	Value
Page	/services/kyc-verification
View	KYC.cshtml

Verification Coverage

The platform supports verification of:

- identity records,
 - shareholder addresses,
 - certificates,
 - bank documents,
 - and background information.
-

Strategic Importance

The KYC workflow strengthens:

- compliance,
 - customer validation,
 - onboarding integrity,
 - and risk management.
-

11. Share Data & Register Management

Overview

The Register Management platform supports registrar-side shareholder administration and maintenance operations.

Platform Configuration

Item	Value
Page	/services/register-management
View	Register.cshtml

Core Operational Coverage

The platform manages:

- shareholder registers,
 - change of address,
 - bank mandates,
 - probate workflows,
 - letters of administration,
 - name changes,
 - rights issues,
 - private placements,
 - mergers,
 - and acquisitions.
-

Strategic Role

This platform represents the operational backbone of the registrar ecosystem.

12. Shared Onboarding Architecture

Common Workflow Pattern

Multiple products across the ecosystem follow a shared onboarding structure.

Standard Onboarding Flow

1. User downloads activation form
2. User completes account/shareholder details
3. Supporting documents and payment proof are attached

4. Documents are submitted to First Registrars
 5. Activation confirmation is issued via:
 - email,
 - SMS,
 - or portal credentials
-

13. Cross-Platform Workflow Architecture

Website → Portal Flow

Typical User Journey

1. User visits public information page
 2. User downloads form or accesses portal
 3. User completes registration externally
 4. Confirmation occurs through email or SMS
-

Website → Mobile App Flow

Mobile Engagement Journey

1. User accesses mobile app information page
 2. User installs app from app store
 3. User registers inside app
 4. PIN-based access is enabled
-

Website → SMS Workflow

SMS Service Journey

1. User submits activation request
 2. Registrar processes activation
 3. PIN or shortcode activation is issued
 4. User interacts through SMS services
-

14. Supporting Infrastructure Dependencies

The onboarding ecosystem relies on several core infrastructure services.

Supporting Systems

System	Purpose
SQL Server	Registrar & shareholder data
MongoDB	Supporting data services
SMTP Email	Notifications & confirmations
Paystack	Payment verification
Shareholder Portal	Form-based onboarding
Ebanqo	Customer support chat

15. Strategic Technology Positioning

The connected ecosystem demonstrates a strong multi-channel shareholder engagement strategy.

Key Strategic Advantages

Multi-Channel Accessibility

Supports:

- web,
- mobile apps,
- SMS,
- registrar workflows,
- and banking integrations.

Inclusive Investor Reach

SMS workflows improve accessibility for users with limited internet connectivity.

Digital Transformation Readiness

The ecosystem already supports:

- electronic payments,

- digital onboarding,
- self-service access,
- and automated notifications.

Registrar Ecosystem Integration

The architecture aligns operational registrar services with modern digital engagement models.

16. Future Enhancement Opportunities

Recommended Next-Phase Enhancements

Digital Identity Automation

- eKYC integrations
- biometric verification
- document OCR processing

Unified Authentication

- single sign-on (SSO)
- centralized identity management

API-Driven Onboarding

- mobile APIs
- fintech integrations
- partner onboarding APIs

Workflow Automation

- digital approval pipelines
- automated document validation
- real-time onboarding status tracking

Mobile Expansion

- push notifications
 - biometric login
 - digital document uploads
-

17. Conclusion

The First Registrars connected platform ecosystem demonstrates a mature and scalable shareholder engagement model built across:

- web platforms,
- mobile applications,
- SMS channels,
- registrar operations,
- and financial workflows.

Together, these systems create a comprehensive onboarding and investor services ecosystem capable of supporting large-scale shareholder operations and future digital transformation initiatives.

The architecture provides a strong foundation for:

- fintech partnerships,
- registrar modernization,
- digital shareholder engagement,
- and enterprise service expansion.

18. Ecosystem Summary

Platform	Primary Function
FRIS Mobile App	Mobile shareholder access
Online Access Portal	Web shareholder services
M-Access	SMS shareholder access
e-Share Notifier	Alerts & notifications
e-Dividend	Dividend payments
e-Lodgement	Broker certificate workflows
KYC Verification	Customer validation
Register Management	Registrar administration
